← Back **History: Commercialization and Growth**
Graded Assignment • 30 min

Due Mar 16, 11:59 PM CET

1. What institution agreed to be responsible for web standards in 1994? 1 point

- (●) World-Wide-Web Consortium (W3C)
- ( ) Stanford
- ( ) CERN
- ( ) Request-Response Congress (RRC)
- ( ) University of Michigan
- ( ) HTML Standards Organization (HSO)
- ( ) Cascading Style Sheets (CSS)

2. Between 1990 and 2006 the number of servers connected to the web grew from what to what? 1 point

- (●) 1 server to 120 million servers
- ( ) 2 servers to 500 million servers
- ( ) 1 server to 1 billion servers
- ( ) 100 servers to 10 billion servers

3. What browser did Netscape ultimately turn into? 1 point

- ( ) Safari
- (●) Firefox
- ( ) Internet Explorer
- ( ) Chrome

4. How did the Mozilla foundation earn their money? 1 point

- ( ) They charged end-users an upgrade fee to go from the free version of streaming video to the pro version
- ( ) They had several Class A IP addresses which they split up and auctioned them and sold them to the highest bidder.
- (●) They added a search bar to their browser, and Google paid for the traffic directed to them.
- ( ) They received a $10 million dollar endowment from Warren Buffet

5. What web technology does Brendan Eich include as part of creating the capabilities we refer to as HTML5? 1 point

- ( ) Visual Basic
- ( ) Ruby on Rails
- (●) CSS
- ( ) PHP

6. Why did JavaScript never fail in the beginning, as most new programming languages do? 1 point

- (●) It was written to be malleable, allowing programmers to establish their own patterns and best practices.
- ( ) It was written by a team of 1000 computer scientists.
- ( ) It was carefully crafted over the course of several years before being released.
- ( ) They convened a conference with 100 computer scientists and had everyone vote on what features to include

7. What was Mitchell Baker "fired" from Netscape for? 1 point

- ( ) Because she added several badly-designed tags (like blink) to HTML without approval
- ( ) For giving trade secrets to Microsoft
- ( ) For making the Netscape browser display a disrespectful pop-up message whenever it was viewing www.aol.com
- (●) For repeatedly giving priority to the needs of the open source community over the needs of the commercial version of Netscape.

8. What was Tim Berners Lee's goal with establishing web standards? 1 point

- ( ) To have total control over how programming for the web was done
- (●) To prevent the proprietary Balkanization of the web
- ( ) To insure that Netscape would be able to control the future directions of the web
- ( ) To make sure that all web browsers were also editors

9. Why did Jeff Bezos choose to start Amazon.com by selling books? 1 point

- (●) Books are the category of items that have the most different products, making it impossible to have a brick and mortar store with the same level of inventory.
- ( ) Because Apple's iTunes store had already cornered the market for music tracks
- ( ) Because the ISBN number allowed each book to be broken into packets and routed across the network for remote printing
- ( ) Books were the easiest item to track because of their ISBN catalogue numbers.
- ( ) Books were the easiest category of items to ship.
