← Back **Week 1 Quiz - HCI Basics**
Graded Assignment • 30 min

Due Mar 13, 11:59 PM CET

1. Imagine you are analyzing the usability of a banking website. Which of the following are examples of good tasks? — 1 point

- [x] Transfer $20 from checking to savings.
- [ ] Use the online banking system.
- [x] Check your savings account balance.
- [ ] Go to the banking login screen. Enter your username and password. Once your account list appears, click on your checking account. Then read the third item in the list of transactions.

2. Which of the following are measures of usability? — 1 point

- [x] Efficiency
- [ ] Design uniqueness
- [ ] Codability
- [x] Learnability
- [x] Memorability
- [x] User Preference
- [x] Speed

3. What is "chunking"? — 1 point

- ( ) Breaking a long list of pieces of information into smaller groups
- ( ) Repeating information over and over to help memorize it.
- (•) Aggregating several pieces of information into coherent groups to make them easier to remember.

4. Which of the following are examples of conventions that improve mental models? — 1 point

- [ ] Providing feedback on user actions
- [ ] Making all controls for an interface visible
- [x] Using a qwerty keyboard on a new device
- [x] Color coding warnings in red and alerts in yellow
- [x] Putting options to create a new file and save a file under a "File" menu in the upper left of the application.

5. Human-Computer Interaction is the study of: — 1 point

- ( ) How computers take jobs away from people
- ( ) The artwork created by people using computers
- (•) How people interact with technology

6. The people included in an HCI study might include: — 1 point

- ( ) Desktop or Laptop Computer Users
- ( ) Mobile Device Users
- ( ) Users who have Technology Embedded in Wearable Items
- (•) All of the above

7. Three important things that have to be understood in HCI are: — 1 point

- (•) Users, Tasks, and Context
- ( ) Screen Sizes, Processor Speeds and Memory Sizes
- ( ) Location, Age and Education

8. How should users be considered within a security system? — 1 point

- ( ) They need to be well-trained in how to use the security systems we build for them.
- ( ) They are often the reason security fails.
- (•) They are an integral part of security and should be considered part of the system from the beginning.

9. HCI is based on an understanding of human's cognitive abilities. — 1 point

- ( ) False
- (•) True

10. Which of the following are factors to consider in designing usable interfaces? — 1 point

- (•) The users' expertise and experience with computers
- ( ) The efficiency of the code that runs the system
- ( ) The impact the interface will have on the cost of the system
