← Back **Business Continuity and Disaster Recovery Planning and Cryptography Quiz**
Graded Assignment • 30 min

Due Mar 16, 11:59 PM CET

1. Organizations should have plans in place to deal with disruptive events. 1 point

- (●) True
- ( ) False

2. Business continuity plans and disaster recovery plans are the same thing. 1 point

- (●) False
- ( ) True

3. Used to identify operational and financial impacts resulting from a disruption of business operations. 1 point

- ( ) SOP
- ( ) BP
- ( ) CFP
- (●) BIA

4. According to FEMA, the four phases of emergency management are: 1 point

- ( ) Mitigation, response, intervention, and planning.
- (●) Mitigation, preparedness, response and recovery.
- ( ) Mitigation, preparedness, quick action, and response.
- ( ) Mitigation, reaction, recovery, and response .

5. The act of setting up a plan to ensure the survival of an organization: 1 point

- ( ) Onsite backup and storage recovery
- ( ) Disaster recovery implementation
- ( ) Incident response management
- (●) Business continuity planning

6. A hot site can be described as: 1 point

- (●) A building already equipped with processing capability and other services.
- ( ) A building for housing processors that can be easily adapted for use.
- ( ) An agreement for two organizations to back each other up.

7. A cold site can be described as: 1 point

- ( ) An agreement for two organizations to back each other up.
- ( ) A building already equipped with processing capability and other services.
- (●) A building for housing processors that can be easily adapted for use.

8. A reciprocal agreement can be described as: 1 point

- ( ) A building already equipped with processing capability and other services.
- ( ) A building for housing processors that can be easily adapted for use.
- (●) An agreement for two organizations to back each other up.

9. Contingency plans should never be tested, since they most likely won't ever be used. 1 point

- ( ) True
- (●) False

10. Contingency plans should be written and periodically updated. 1 point

- ( ) False
- (●) True

11. Encryption is used to stop unauthorized people from reading information. 1 point

- ( ) False
- (●) True

12. Cryptography relies on the use of an algorithm and access controls. 1 point

- ( ) True
- (●) False

13. Cryptographic system in which both sender and receiver share a common key. 1 point

- ( ) Asymmetric
- (●) Symmetric

14. Cryptographic system in which a pair of keys is used, one made public and one kept private. 1 point

- (●) Asymmetric
- ( ) Symmetric

15. Which cryptographic system is faster, in relative terms? 1 point

- (●) Symmetric
- ( ) Asymmetric

16. Type of cryptographic system that combines symmetric and asymmetric features: 1 point

- ( ) Desperate
- ( ) DSS
- (●) Hybrid
- ( ) DES

17. Used to determine if a message has been changed: 1 point

- ( ) Asymmetric cryptography
- ( ) Hybrid cryptographic system
- ( ) Symmetric cryptography
- (●) Message digest

18. Prevents an individual from claiming he/she did not send a message: 1 point

- (●) Electronic signature
- ( ) Message digest
- ( ) Symmetric cryptography
- ( ) Asymmetric crytography
