← Back **Introduction and History of Astrobiology**
Graded Assignment • 30 min

Due Mar 13, 11:59 PM CET

1. Astrobiology is concerned with understanding which of the following areas of research? 1 point

- [x] The possibility of life beyond Earth
- [x] The origin of life
- [x] The study of life in extreme environments and the limits of life on the Earth
- [x] The evolution of life on the Earth

2. Life on Earth is not disconnected from the astronomical environment. Which natural event MOST clearly demonstrates how to understand life on the Earth we must have a grasp of space sciences? 1 point

- ( ) Hurricanes
- (•) Asteroid and comet impacts
- ( ) Volcanic eruptions
- ( ) Earthquakes

3. Which renaissance scientist speculated on the possibility of other Earth-like planets? 1 point

- (•) Giordano Bruno
- ( ) Percival Lowell
- ( ) William Herschel
- ( ) Leonardo Da Vinci

4. Which enlightenment scientist observed the circular impact craters on the Moon and considered that they might have been built by a civilization? 1 point

- (•) William Herschel
- ( ) Giordano Bruno
- ( ) Galileo Galilei
- ( ) Christian Huygens

5. The first experiment to study whether the building blocks of life could be produced in simulated ancient atmospheres were conducted by who? 1 point

- ( ) Percival Lowell
- ( ) Carl Sagan
- (•) Stanley Miller and Harold Urey
- ( ) Edmund Hilary

6. Where do scientists look to try to find evidence for life on the early Earth? 1 point

- (•) In the ancient rock record
- ( ) In ancient salts
- ( ) In ancient amber
- ( ) In ancient ice

7. The first spacecraft to directly look for evidence of life on Mars were called: 1 point

- ( ) The Huygens spacecraft
- ( ) The Mars spacecraft
- (•) The Viking Landers
- ( ) The Venera spacecraft

8. Which was the first spacecraft to send back images directly from the surface of Venus? 1 point

- ( ) The Mariner spacecraft
- ( ) The Voyager spacecraft
- ( ) The VenusSat spacecraft
- (•) The Soviet Venera spacecraft

9. Which moon has been found to have evidence of complex organic chemistry occurring on its surface and in its atmosphere? 1 point

- ( ) Enceladus
- ( ) The Earth's Moon
- (•) Titan, a moon of Saturn
- ( ) Europa

10. The first attempt to send a message to extraterrestrial intelligences using a radio telescope was attempted from 1 point

- ( ) Lovell telescope, UK
- (•) The Arecibo Dish Observatory, Puerto Rico
- ( ) Parkes Observatory, Australia
- ( ) Green Bank telescope, USA
