Graded Assignment • 30 min

Due Mar 20, 11:59 PM CET

1. The OSI model has how many layers? 1 point

- ○ 8
- ○ 4
- ○ 5
- ◉ 7

2. Which is not a layer in the OSI model? 1 point

- ○ Physical
- ○ Session
- ○ Application
- ◉ Abstract

3. A component that leaves a system open to compromise 1 point

- ◉ Vulnerability
- ○ Attack
- ○ Threat
- ○ None of the above

4. The potential for a violation of security 1 point

- ◉ Threat
- ○ Vulnerability
- ○ Attack
- ○ None of the above

5. An attempted violation of a computing system or network 1 point

- ◉ Attack
- ○ Threat
- ○ Vulnerability
- ○ None of the above

6. Organizations should carry out risk assessments to help find an acceptable balance between security and cost 1 point

- ○ False
- ◉ True

7. The concept which holds that modification of data is allowed only by authorized users 1 point

- ◉ Integrity
- ○ Confidentiality
- ○ Availability
- ○ None of the above

8. The concept which holds that data should only be accessed by those who have a legitimate right to do so 1 point

- ◉ Confidentiality
- ○ Integrity
- ○ Availability
- ○ None of the above

9. The concept which holds that data should be useable by legitimate users, when they need to do so 1 point

- ◉ Availability
- ○ Integrity
- ○ Confidentiality
- ○ None of the above

10. Type of attack described as the interception of messages without modification 1 point

- ◉ Passive
- ○ Sniffing
- ○ Shoulder surfing
- ○ Active

11. Type of attack described as one in which an unauthorized change is attempted 1 point

- ○ Passive
- ○ Sniffing
- ○ Shoulder surfing
- ◉ Active

12. Type of attack which involves the re-use of captured data at a later time 1 point

- ◉ Message replay
- ○ Denial of service
- ○ Message modification
- ○ Masquerade

13. Type of attack which involves changing either packet header or payload contents 1 point

- ○ Denial of service
- ○ Masquerade
- ◉ Message modification
- ○ Message replay

14. Type of attack which involves flooding a network or system with trafficQuestion text 1 point

- ○ Masquerade
- ○ Message modification
- ◉ Denial of service
- ○ Message replay

15. Program that has hidden instructions to carry out malicious activity 1 point

- ◉ Trojan
- ○ Virus
- ○ Worm
- ○ None of the above

16. Type of program that can replicate itself and create a high demand for services 1 point

- ◉ Worm
- ○ Trojan
- ○ Virus
- ○ None of the above

17. Type of program that attaches itself to other programs in order to spread 1 point

- ◉ Virus
- ○ Worm
- ○ Trojan
- ○ None of the above

18. Network routers have tables which may be vulnerable to attack 1 point

- ◉ True
- ○ False
